### **PROJECT:**

#### **1. Title: BUG TRACKING SYSTEM (Mini Project)**

Bug Tracking System is an ideal solution to track the bugs of a product or an application. The main objective of this system is to develop a flawless system which access real time information anywhere in the world. Another main objective of this system is tracking all the defects or bugs in the project and make the project as user-friendly and bug free system.

Technologies used: HTML, PHP, JavaScript, MySQL

#### **2. Title: CONTEXTUAL SEGMENTS USING REGULARIZATION TECHNIQUES (Major project)**

The usage of recommendation systems is expanding across a wide range of application domains, including e-commerce, movie and music recommendations, tourism, news, advertising, financial markets, social networks, etc. Traditional recommendation systems like content-based or collaborative filtering-based techniques model user preferences and deliver recommendations.
